FOR IMMEDIATE RELEASE  
May 10, 2007

## **TUOMO HYYSALO (49), HAS BEEN APPOINTED CEO OF AW-ENERGY OY**

He will assume the full responsibilities at the company during the summer 2007 after completing the transition from his current successful position as SVP, Sales EMEAI at InterfaceFLOR, a carpet tile manufacturer and one of the leading companies in sustainability purchasing 100 % of it's electricity needs as renewable Green Energy in Europe.

Tuomo has a Masters in Manufacturing Engineering from the University of Technology in Helsinki and an MBA from University of San Diego. Combining this to his past work experiences in leading, turning around and growing Industrial Companies in various fields including engineering and energy and his wide experience in M&A, we believe Tuomo is in a great position to take AW Energy to the next stage in it's drive to commercialize the patented state-of-the-art WaveRoller technology.

Ilkka Homanen, the previous CEO, will leave AW Energy to pursue his career with a major steel parts supplier. We thank him for his great contribution and wish him success in his future!

Timo Peltola

Chairman of the Board
